# Organic ROOTING Powder

Growth Supplement

50g e

**Vitax Organic Rooting Powder** is a growth supplement containing an organic source of seaweed and minerals to help create conditions which encourage deep and healthy root development in cuttings and young plants.

#### Directions for Use

**For Cuttings:** Take soft, medium or hardwood cuttings using a sharp knife. Cut straight across below a leaf joint or bud. Remove leaves from the lower third of the cutting. Stand cuttings in water after preparation. Shake off excess water then dip 1- 2 cm into rooting powder prior to pricking out with a dibber into a sand/peat compost. Alternatively, sprinkle the powder sparingly directly into the planting hole prior to pricking out. Where pots or trays are used, cover with a clear polythene bag. Use elastic bands to seal around the lip of the pot or tray and place in a light but not sunny position.

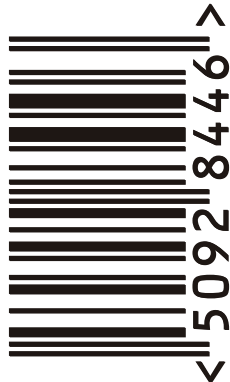

**For Young Transplants:** Sprinkle the powder sparingly into the planting hole prior to re-potting young plants.

This root growth supplement contains no synthetic hormones or fungicides.

Not suitable for ericaceous (acid loving) species.

**Helpful Advice:** Wash hands after use. Product may irritate cut or broken skin. Store in a dry place away from children, pets and foodstuffs.

**Vitax Limited.** Owen Street, Coalville, Leics, LE67 3DE
